

ServiceNow Security Operations Engineering

The Adarma Way

ServiceNow Security Operations (SecOps) provides a single platform for response that connects security with IT Ops and the wider business. Your response becomes more efficient, reducing business risk.

Tightly integrated with your existing Vulnerability Management, SOC, SIEM, Threat Detection and other cyber security systems, getting the most value from ServiceNow SecOps relies on a deep understanding of security, ServiceNow ITSM (and the wider threat landscape), as a set of systems and processes aligned to deliver a single outcome.

Without understanding this deeper context, anticipating, articulating, and meeting your organisation’s SecOps needs can be difficult.

Adarma doesn’t just understand that – we live it. It’s in our DNA.

Backed by a wider practice with years of expertise in designing, implementing, and maintaining SOC and SIEM systems for a range of FTSE 350 clients, our ServiceNow consultants are trained security engineers by experience and profession. We can ensure that your cyber security ask meets your cyber security need.

We’ll implement, integrate, and configure ServiceNow Security Operations, train your teams, and advise on your next steps.

And when you’re ready, our team of solution architects, engagement managers, and technical consultants will work with you to identify and deliver the enhancements you need to take you to the next level.

Adarma’s Delivery Team

Simplifying many outputs into the SecOps single response platform requires careful integration with your existing security tools. And that needs expertise with each one, coupled with a thorough understanding of the security principles that guide them.

- **The Adarma ServiceNow SecOps practice** is comprised of security professionals with a range of ServiceNow specialisations.
- **Qualified, experienced consultants** with a background in both cyber security and ServiceNow. We’ll always ensure that the ask meets the need – security is who we are.
 - **Experienced in all aspects of the platform**, including:
 - Implementation, configuration, integration, orchestration and workflow automation, across
 - Security Incident Response, Vulnerability Response and Threat Intel components, and
 - Aligning with ServiceNow’s Integrated Risk Management Suite.

Why Adarma?

- **Officially recognised by ServiceNow** as having product line expertise in Security Operations – one of only 3 throughout EMEA.
- **We understand the design and purpose** of the platforms SecOps brings together – we speak your SME's language because we’re natives.
- **We deliver value through the services** we implement and deliver – not upselling or vending licences.
- **A Premier ServiceNow Partner** – achieving our status through skill, training, and dedication.
- **Average customer satisfaction score of 9.5/10** via ServiceNow mandated satisfaction surveys.

ServiceNow Security Operations Engineering

About Adarma

We're one of the largest independent security services companies in the UK. Founded and run by experienced senior security leaders, we know security and how to deliver real value in the real world. That's why our clients are successful FTSE 350 organisations from all industry sectors.

Our teams are a diverse group of customer-facing technical experts and business-facing consultants, all with the same objective and united by the same goal: to help our clients prepare for attack and stand side-by-side with them when it happens.

We have the experience, proven track record, and recognition as industry specialists to ensure our cyber security solutions are tailored to your needs.
