

# Managed Services Component: Adarma Threat Intelligence Platform

**Intelligence is critical** to detecting threats to your organisation. The strongest defence relies on knowing the enemy: the traces attackers leave across systems even at the earliest stages of a potential incursion, and the artefacts dropped during (or post) any compromise of your assets.

If a compromise is about to occur or is underway, you need to be alerted as soon as possible. It's vital that analyst's information about these Indicators of Compromise (IOCs) stays current to match the threat landscape – or your risk increases.

But intelligence alone isn't a guarantee of safety. That needs technology, capability, and experience to transform awareness into the actions that will turn monitor and detect threats – and alert you when they become dangers.

Adarma has that technology, capability, and experience – and we know how to use it.

## Adarma's Managed Services

Adarma was founded to make the world a safer place to do business, and our managed service products are designed to assure our customers of the best possible cyber defence.

Our analysts are cyber security professionals with combined decades of experience in SOC management and operations.

Our SOAR capabilities make us fast and efficient in incident correlation and triage, IOC enrichment, and reporting. Our vulnerability management solution lets us identify, contextualise, track, and prioritise remediation recommendations to reduce risk in a managed and intelligence-driven way.

The partnership and transparency we offer is unequalled, customising our products and their operation to your unique needs, with tools and dashboards to let you see just how effectively they're performing.

## Adarma Threat Intelligence Platform

Supported by these capabilities, the Adarma Threat Intelligence platform provides continuously updated intelligence on IOCs curated from a global network of expertise enriched by Adarma's threat hunting and analytical prowess.

You'll be kept up to date with threat indicators as threat fronts emerge globally – and custom feeds specific to your sector or risk concerns are possible, complementing Adarma's recommended intelligence.

The Adarma Threat Intelligence platform identifies and tracks the indicators of compromise that let our analysts detect threats as swiftly as possible – giving you the confidence that risks to your assets are minimised.

## Key Features

**Integrated threat intelligence feeds** curated by Adarma and global experts

**Customisable to specific attributes or techniques**, as well as Adarma's supplied suite of curated intelligence of pre and post compromise artefacts.

**Splunk-approved TA** to manage ingestion into your own Splunk instances if required

**Ongoing and active development** guided by customer feedback
